CONSENT AGREEMENT AND FINAL ORDER

NOW ON THIS 21st day of September, 2020, the above captioned matter comes before the Kansas Board of Veterinary Examiners ("Board"), by agreement with Heath Rose, D.V.M. ("Respondent"), for the purpose of resolving the above captioned matter.

Case 20025

2. On or about June 8, 2020, information was received by the Board indicating that the Respondent may have violated certain provisions of the Kansas Veterinary Practice Act or the Kansas Administrative Regulations governing the practice of veterinary medicine in Kansas. A subsequent investigation revealed the following facts to be established by a preponderance of evidence:

- a. On February 18, 2020, Owner brought her dog, Moose, to Respondent for dental cleaning at Trailridge Pet Hospital, in Shawnee, Kansas. Respondent documented that Moose had severe periodontal disease.
- b. During this cleaning, Respondent extracted a tooth from Moose's right mandibular area. Respondent then palpated a fracture to the right mandibular area, but he did not complete an x-ray of this area. Respondent placed a cerclage wire at the fracture site.
- c. On or about March 7, 2020, Owner returned Moose to Trailridge and reported that he was unsteady and falling over. Respondent found that Moose had a painful area to the left temporal/mandibular area. Respondent provided treatment to Moose related to this complaint. Further, Respondent scheduled Moose to for a follow-up examination to be completed under sedation related to the left temporal/mandibular area pain. Respondent did not document if he offered to refer Owner to another veterinarian for a second opinion.

- d. On or about March 21, 2020, Moose presented to Respondent for sedation and a recheck of the left temporal mandibular pain. During this procedure, Respondent documented that he removed the cerclage wire from the right mandibular area.
- e. On or about April 1, 2020, Owner, on her own, took Moose to Companion Animal Dentistry in Lenexa, Kansas for a second opinion. An x-ray completed at this clinic revealed two (2) wire fragments in the right mandibular area.
- f. Additionally, a dental procedure was completed that day, which included the removal of the wire fragments from the right mandibular area. Further, an additional tooth extraction was completed, with additional extractions scheduled.
